June 5, 1998

Mr. Steven D. Smith
Manager, Remedial Management
10300 Olive Boulevard
Post Office Box 66760
St. Louis, Missouri 63166-6760

Dear Steve:

Please find enclosed the plat map information you had requested at our meeting back on April 20th. I apologize for the lateness.

As we had discussed at our meeting, the opportunity to complete investigative activities within the Site Q "addendum areas" will end by early fall if this work is to be completed by the end of this year. Although both Solutia and Illinois EPA may still be in the process of evaluating the January 8, 1997 proposal for Solutia to perform remediation at Site R, I do not see any reason why the investigative work within the addendum area cannot proceed. Since Illinois EPA and Solutia appear to be in reasonable agreement as to what work remains to be performed in the addendum areas, Illinois EPA is anxious to see Solutia fulfill its remedial investigation requirements of the existing RI/FS consent order. As such, Illinois EPA expects to see a workplan for completion of this work very soon.

Please give me a call if you have an idea when Solutia can produce a workplan for these remaining investigative activities.

Yours Truly,

A handwritten signature in black ink, appearing to read "Paul E. Takács".
